

Fix 2

AQUAEL

Smartly
Fixed

Fix 2 is an electronic, glass **heater** for aquaria. With its compact size, it is perfectly suitable for small and medium size tanks. The heater automatically maintains the water temperature at **25°C**. It also features a **Smart Heating System (SHS)** – a smart power adjustment technology. A built-in microprocessor **adjusts the heating** power to maintain the desired temperature in the aquarium and prevents sudden temperature changes.

This way, **the ideal thermal conditions** for the aquarium inhabitants are maintained.

Fix 2

- **Electronic, glass heater**
- Features a **Smart Heating System** – adjusts the heating power to the size of the tank and the ambient conditions to optimise energy consumption.
- **High accuracy** ($\pm 0.5^{\circ}\text{C}$)
- **Maintenance-free** – maintains a constant temperature of 25°C ($\pm 0.5^{\circ}\text{C}$)
- Compact size – ideal for small and medium-sized aquaria
- No overprint on the glass
- Conforms to European standards for heating equipment
- **Made in Poland**

The LED light indicates the water temperature and heater operation

Slow flashing

The heater heats the water to 25°C .

Solid light

The heater maintains the temperature at 25°C .

Rapid flashing

Water temperature above 25°C
