Opti Tank

Clear from every angle

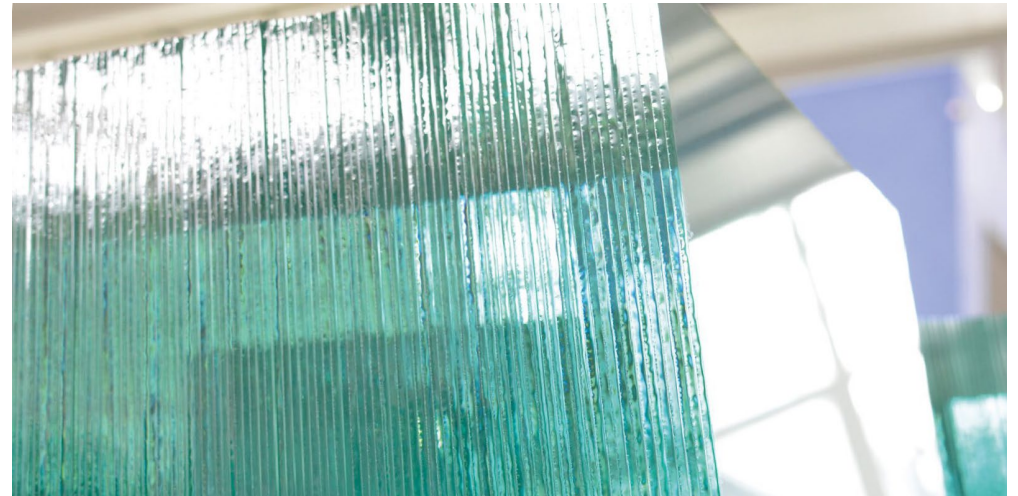

A crystal clear, unobstructed view of the inside of the aquarium. This is possible in the Opti Tank family – aquariums made of opti type glass.

Perfect clarity reflects the natural colours of the plants and animals, and creates the effect of crystal clear water. Refined details, polished and ground edges, precise glass bonding create an extremely light and aesthetic arrangement.

Opti Tanks

Opti type glass features

Opti type glass has been stripped of its greenish tint in a special de-iron process. As a result, the walls of the aquarium become crystal colorless, with a high light transmittance coefficient. All this ensures an uninterrupted visual effect. The water and the arrangement are almost suspended in the air, the plants and animals can be admired in their natural colors.

Details which distinguish

The Opti Tank range of aquariums is distinguished by carefully thought-out details. Different dimensions give you design freedom. The safe, polished edges are finished in trapezoidal or diamond cuts. OptiTank Rounded is made in a technology that completely eliminates the connection of the side walls with the front of the tank.

1 Opti Tank Opti Tank Scape

Various sizes, from 19 to 200 liters, including two models dedicated specially to aquascaping enthusiasts.

2 Opti Tank Diamond

The noble aquarium is distinguished by a unique diamond cut at an angle of 45°.

3 Opti Tank Rounded

Rounded corners allow you to admire the beauty of the underwater arrangement from every perspective.
