Glossy Marine
Aquarium set

Glossy Marine – dive into the world of marine aquariums

The Glossy Marine set is the perfect choice for anyone who dreams of creating a piece of coral reef in their own home.

Thanks to its compact dimensions and integrated, **complete filter panel**, the set combines professional solutions with ease of use.

This kit **is designed for beginners** who want to safely and effectively start their adventure with marine aquariums, **as well as enthusiasts** looking for a smaller marine aquarium.
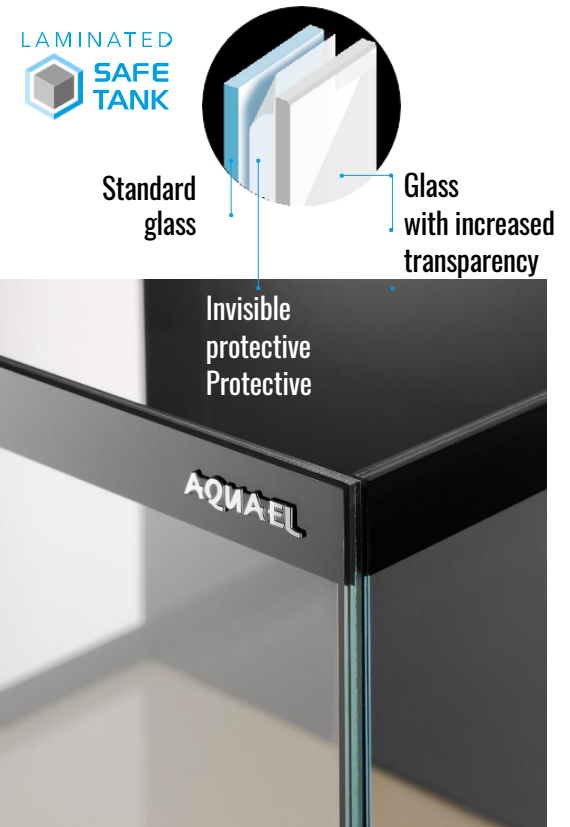

Glossy Marine

Aquarium set

open tank measuring 60x58x50 cm – greater depth for arrangement, adequate gas exchange for marine aquariums

front and sides made of Opti glass – high transparency without a greenish tint

retention chamber with a scale (liters/gallons) showing how much evaporated water needs to be replenished – easy to use and maintains proper filtration

special reinforcement of the front and side panes using our proprietary Safe Tank technology – a system of layered pane bonding for greater safety in the event of tank breakage
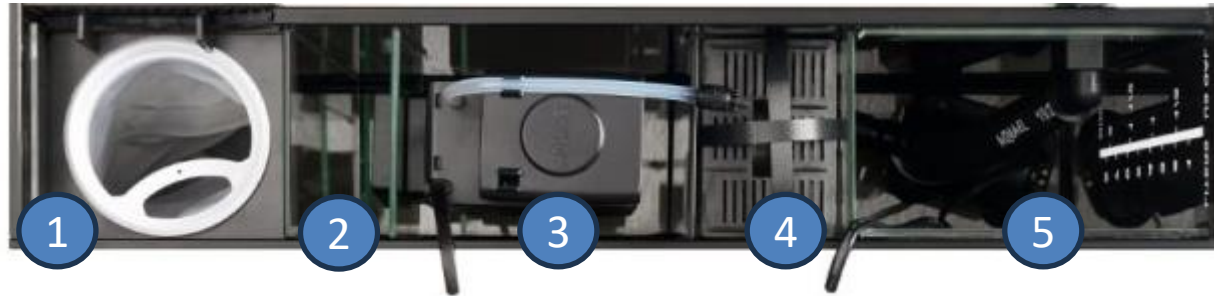

partition separating the display section from the filtration section made of black-tinted glass – extraordinary depth and emphasis on the aesthetics of the arrangement

LAMINATED
SAFE TANK

Standard glass

Glass with increased transparency

Glossy Marine
Filtration

Glossy Marine is equipped with a well-designed and **complete filtration system**. The rear panel cleans the water mechanically, biologically and chemically (optional).

five-chamber filter panel – complete mechanical, biological and chemical filtration (optional)

filter panel separated from main chamber – aesthetic and tight separation of filtered water

lowered partitions between chambers – safety and elimination of the risk of water spillage
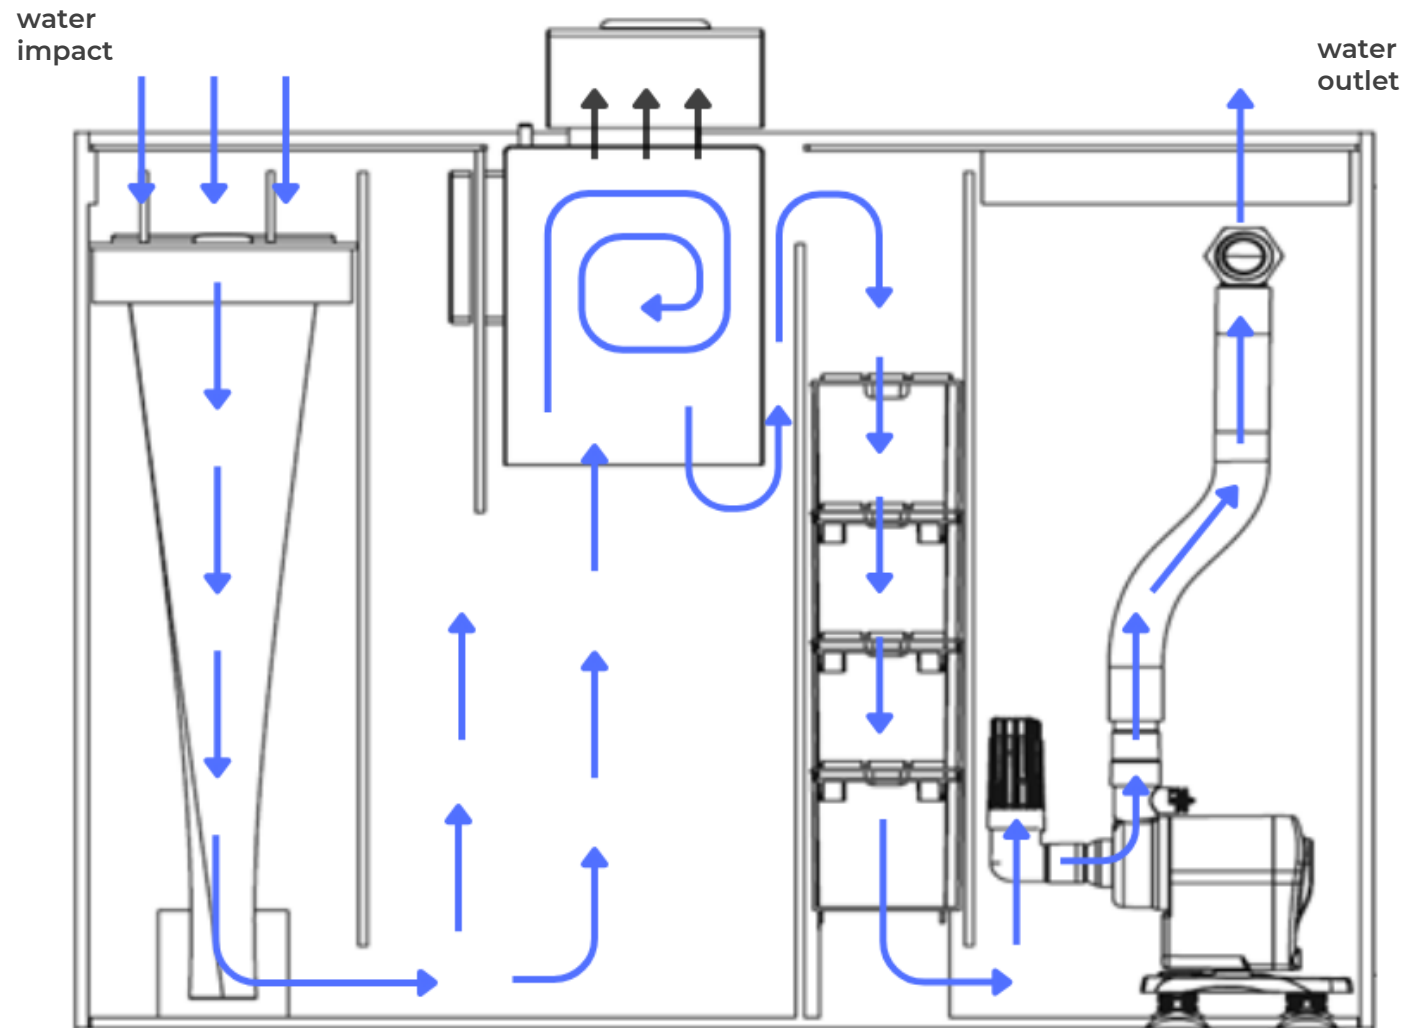

FILTER CHAMBERS

1. Filter sock
2. Space for a heater or additional electronic components
3. Protective cover
4. Baskets for loose media
5. Circulation pump

Glossy Marine
Filtration

In the Glossy Marine set, water **goes through several stages of purification**. The special design forces a specific water circulation.

Glossy Marine
Filtration

Effective filtration is crucial in the sensitive to changes in the parameters of saltwater aquariums. That is why we have equipped the Glossy Marine set **four filter media baskets** with an easy removal system.
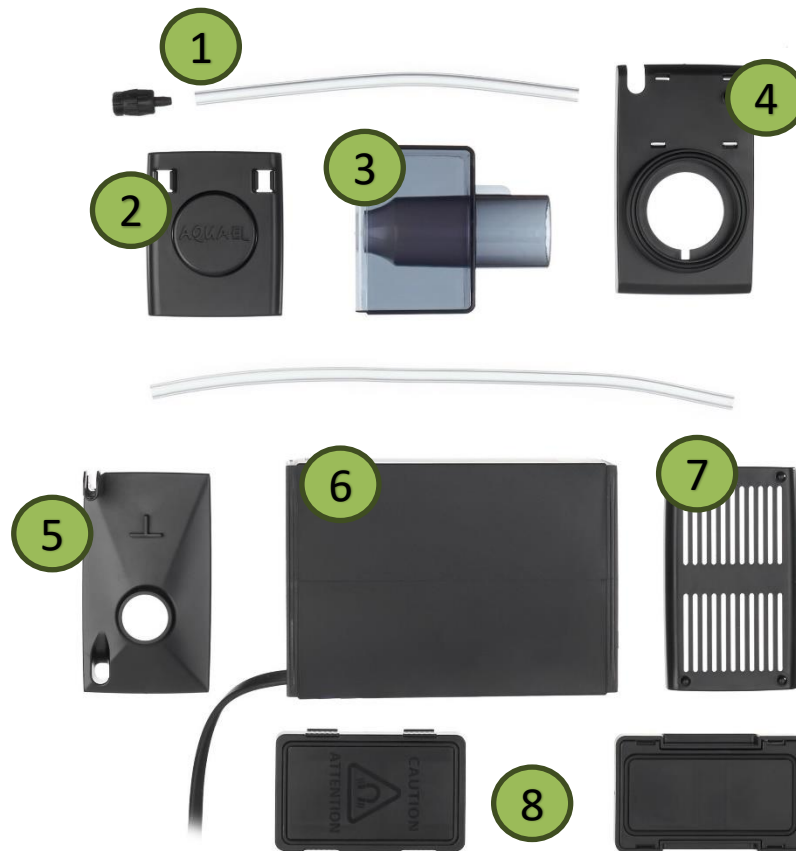

outlet water

retention chamber with circulator (Circulator 2000)

BioCeraMax 600 biological media included

media baskets

Protein skimmer

The Glossy Marine set includes **an effective protein skimmer**, essential in a marine aquarium. The device draws in water along with air and mixes them together in a reaction chamber. This creates a thick foam to which organic impurities attach themselves. The foam is then pushed into a special cup located at the top of the device, where the impurities are collected and removed from the aquarium.

This mechanism prevents the formation of harmful compounds and **keeps the water clean**.

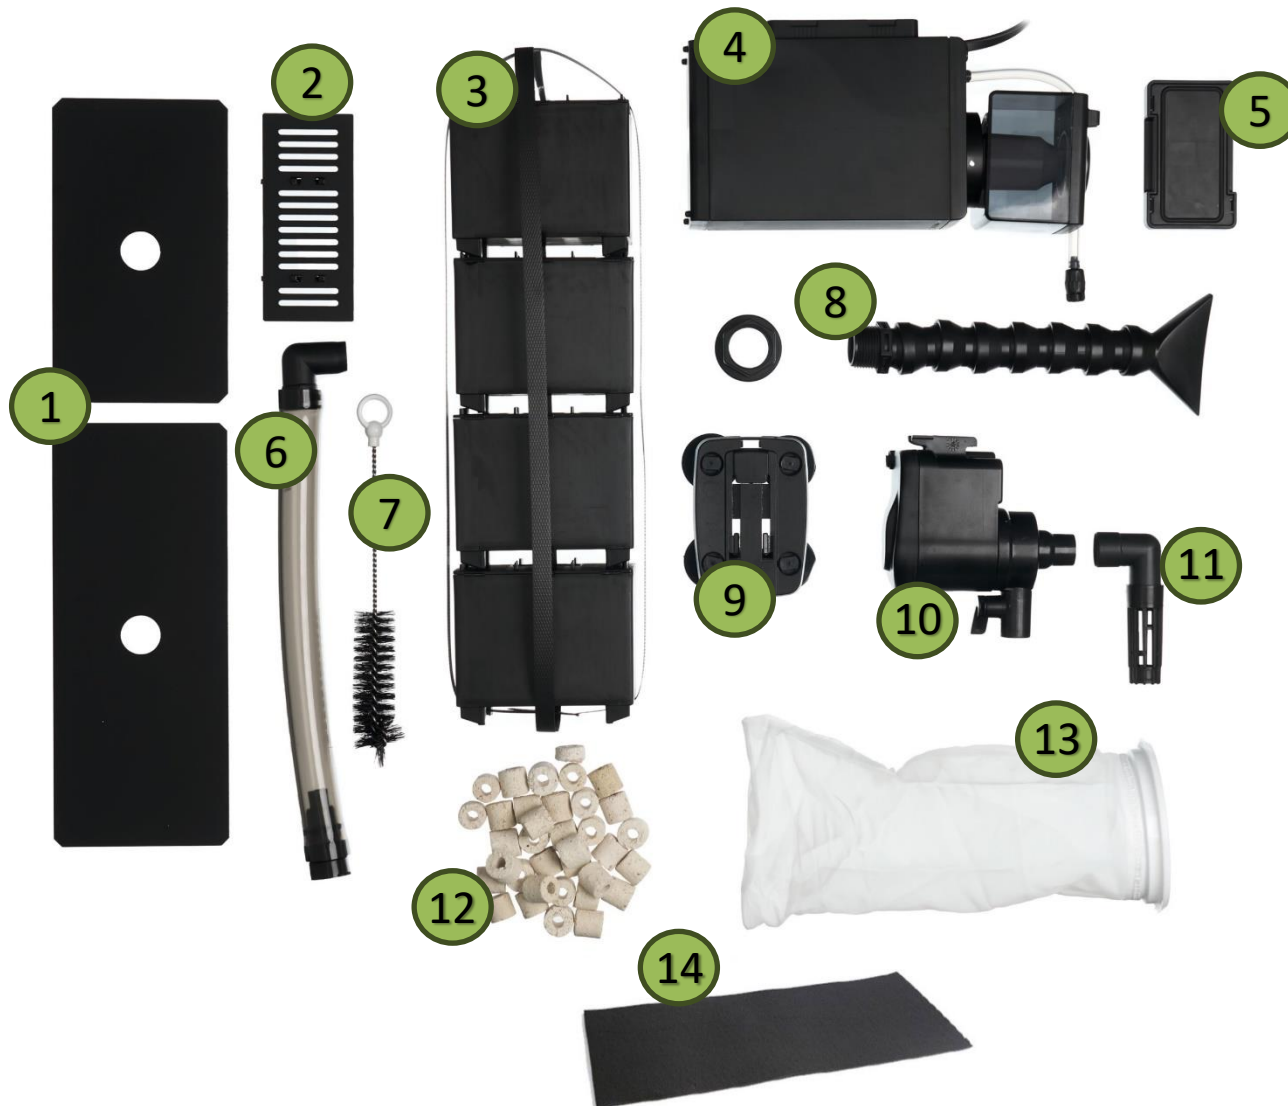

PARTS LIST
1.   Aeration tube
2.   Protein waste container lid
3.   Protein contamination container
4.   Skimmer top cover
5.   Lower skimmer cover
6.   Device body
7.   Water inlet cover
8.   Magnetic fastener

Glossy Marine
Equipment

The set **comes complete** with everything you need to start a marine aquarium, including **functional accessories** such as a brush for cleaning the skimmer, elbows, and circulator, a mat for under the aquarium, and loose biological media to get you started.

PARTS LIST

1. Filter section covers
2. Filter comb
3. Filter media basket
4. Protein skimmer
5. Magnet for the skimmer
6. Elbow pipe
7. Cleaning brush
8. Flattened outlet pipe with seal
9. Circulation pump base with suction cups
10. Circulation pump
11. Suction basket
12. Loose media
13. Filter sock
14. Aquarium mat
