Thermometer BT

Electronic thermometer

THERMOMETER BT is a smart electronic thermometer controlled via the Aqual BT app. It provides **precise, dual-zone** monitoring of both aquarium water temperature – from nano tanks to large setups – and ambient (room) temperature. The app records all readings and displays them on a detailed graph, allowing you to accurately analyze temperature fluctuations, such as day-to-night changes.

With **customizable min/max temperature thresholds**, the app instantly notifies you whenever the temperature goes outside your set limits. This is especially valuable for verifying proper heater performance – a feature highly appreciated by keepers of temperature-sensitive fish, shrimp, and other aquatic species.

Thermometer BT

Electronic thermometer

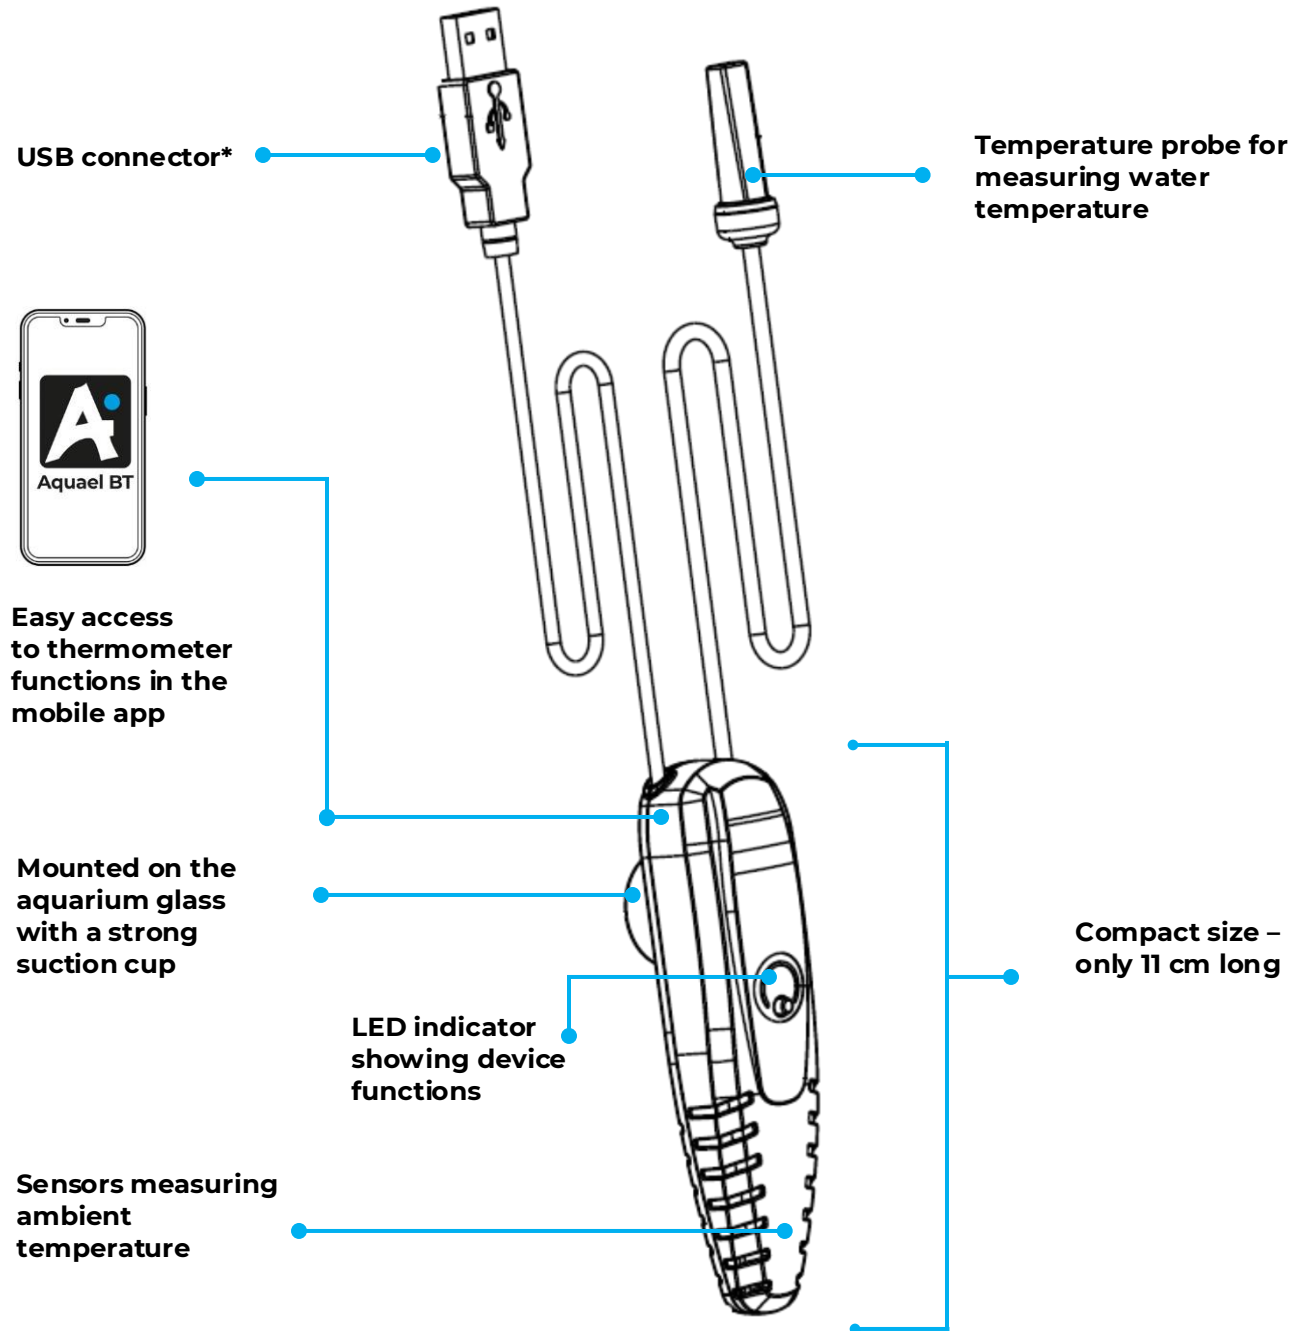

Dual sensors – measuring the current tank temperature and the ambient (room) temperature

Functional LED indicator – color notifications of the current thermometer status and alerts for deviations

Compact size and a minimalist housing design

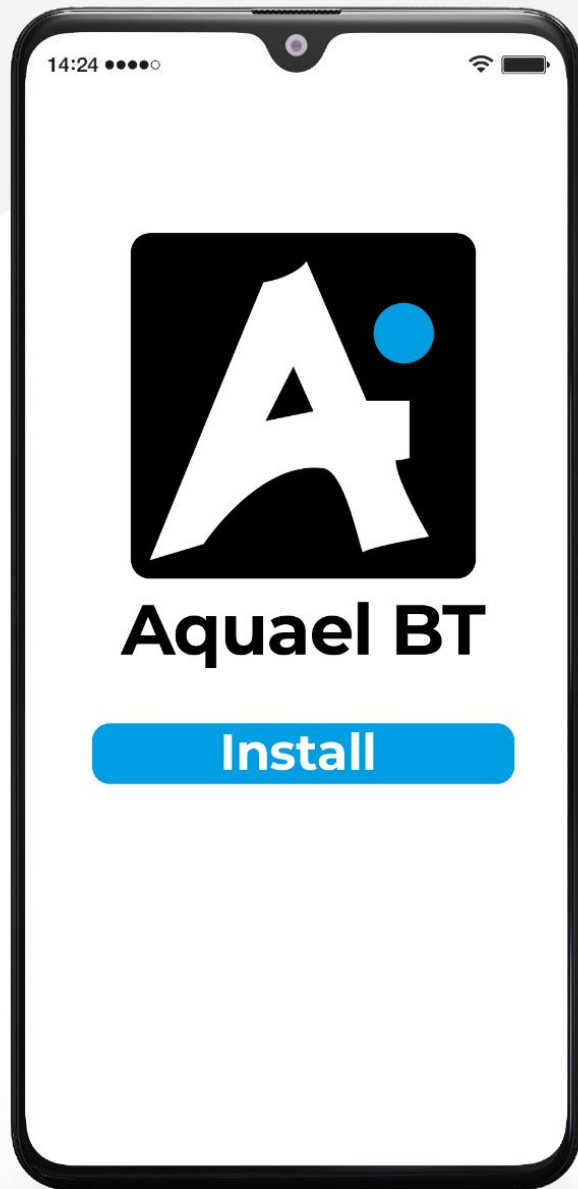

Designed to be placed outside the tank; only the probe should be immersed in water

All functions are controlled via the Aqual BT app

*power adapter not included

AQUAEL

Aquael BT Application

All functions in one mobile app

We strive to keep up with the latest technological solutions. That is why we propose to make the maintenance of your aquarium easier with **Aquael BT App**.

Remote control of your aquarium lighting, heating, filtration and much more!

Communicate with your aquarium equipment via your smartphone or tablet using Bluetooth technology.

The app can also control multiple lamps and filters at the same time, as well as share access between other people.

Aquael BT App

Settings personalisation

Use the Aquael BT App to tailor the operation of the units to the individual needs of your aquarium!

Set filter flows and modes, lighting intensity or heating temperature – all in a user-friendly way with simple gestures on the screen. Follow the natural diurnal rhythm using your smartphone or tablet.

It's all about Custom mode!

Gain precise control over the processes taking place in your aquarium. Take advantage of the technological innovations to make your aquarium an oasis of perfect balance.

Socket BT Duo

Aquarium controller

CONTROL VIA
BLUETOOTH APPLICATION

AQUAEL BT

A smarter, more convenient thermometer – now controlled via Bluetooth with the Aqual BT app!

Monitor real-time water and ambient temperatures, set custom high/low thresholds for instant alerts, and review full temperature history – all directly in the app.

Customize and remotely optimize conditions in your aquarium

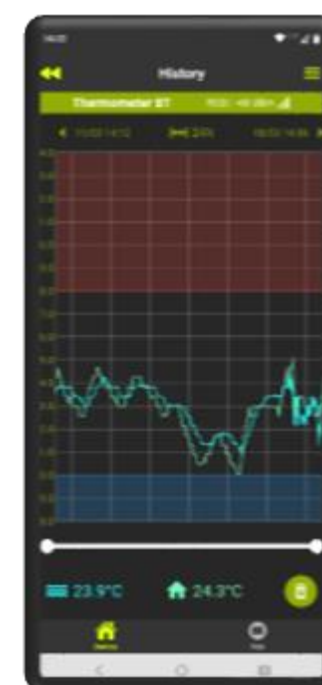

Dual-zone temperature measurement

Temperature alerts

Measurement history

Thermometer BT

Electronic thermometer

Control

Aquael BT app

- **full control of thermometer functions** without approaching the aquarium
- **preview of the current temperature** in the tank and the ambient temperature
- **history saved** every 20 minutes
- **interactive graph** showing the tank temperature history throughout the day
- **temperature scale setting** – Celsius or Fahrenheit

Safe

- **alarm signaling** – if the water temperature is too high or too low relative to the set limits, a warning appears in the app and the LED indicator starts pulsing
- **settings protection** with PIN lock and **error monitoring**
- powered by safe 5 V

Thermometer BT

Electronic thermometer

Thermometer BT	
Voltage [V]	5
Total power consumption [W]	0,5
Operating frequency range [GHz]	2,4-2,4835
Suitable for both freshwater and saltwater	Yes
Connection method	Bluetooth 5.0
Index	135037
