

5-in-1 aquarium cleaner

The 5-in-1 aquarium cleaner combines five interchangeable attachments with a **telescopic handle suitable for both smaller and larger aquariums**. One tool can be used to clean glass, remove algae, plant aquatic plants, level the substrate and catch fish or debris. It is a practical solution for everyday maintenance of freshwater and marine aquariums and **helps reduce the number of separate tools you need to keep**.

- **Five interchangeable attachments** – a sponge, scraper, rake, tweezers and fish net allow different maintenance tasks to be carried out using one handle

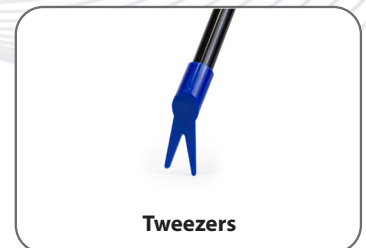

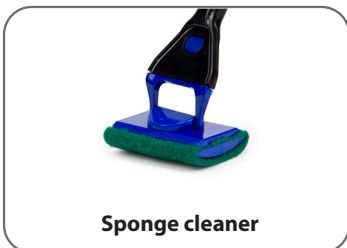

- **Telescopic handle 40–60 cm** – lets you adjust the reach to the size of the aquarium and the area being serviced

- **Push-button attachment release** – makes it easy to switch quickly from glass cleaning to aquascape maintenance

- **Space-saving design** – one interchangeable handle is used for all attachments

- **Convenient hanging loop** – helps keep the tool within easy reach
- **Ribbed grip** – provides a secure hold and helps prevent the tool from slipping out of your hand
- **Sponge and metal scraper** – allow you to match the attachment to the type of dirt, from deposits on the glass to stubborn algae
- **Accessories designed for glass** – support safe maintenance of glass aquarium walls
- **For freshwater and marine aquariums** – one set can be used for both types of tanks
