New!

Decorative plants

Imitations of natural plants in various designs.

A wide selection of sizes, types, colours and finishing materials ensures that every aquarist can find a decoration suited to their aquarium.

Did you know that...

YOU CAN CREATE A LAYERED AQUASCAPE?

Place the lowest plants (8–11 cm) at the front of the aquarium, medium-height plants (12–18 cm) in the middle, and the tallest ones (25–31 cm) at the back. This arrangement helps create a sense of depth and makes the whole aquascape look more natural and spacious.

VARIOUS SHAPES AND COLOURS

From delicate, narrow leaves to broad and spreading foliage. The diverse colour range makes it possible to create both natural-looking and more striking compositions.

PLASTIC PLANTS

WIDE RANGE OF SIZES

Plants from 8 to 31 cm high. The variety of sizes makes it easy to match the decoration to the size of the aquarium and the planned arrangement.
